

**FABRICS: CANVAS: CANVAK SINGLE FILL DUCK**

Our Cavak Single Fill Duck Canvas has been treated and waxed paraffin in Ohio, U.S.A. They are commonly used for multi-purpose tarps where water proof fabrics are required and also good for breathable applications for natural goods coverings. And they are widely used for agricultural and lumber covers. Hot asphalt tarpaulin is also a very common application for our Pyrosnuff treated Canvak Canvas. The type of Pyrosnuff treatment gives the fire-retardant coating that meets or exceeds the CPAI-84 specification, which our FR coated Canvak Canvas would be perfect fabrics to use for high temperature application.

Olive Drab
